RAISED PEDESTRIAN ISLANDS

BENEFITS

US Reflector's solid rubber raised platforms alert approaching motorists to reduce speed by enhancing the presence of pedestrian crosswalks. Pedestrian platforms can accommodate any road width allowing curb-to-curb installation without excavation.

- Surface mounted installation eliminates the need for excavation
- Fast and easy installation
- Accommodates any road widths Curb to Curb
- Taper end systems at locations were curb is non existent
- Tough and flexible – follows surface undulations
- Impact resistant – retains form
- Reflective markings for day night visibility

US Reflector 610 N. Mountain Rd Newington CT 06111 Tel: 860-289-8033 www.usreflector.com

RAISED PEDESTRIAN ISLANDS

The raised table is available in two configuration options to suit location and budget. Both durable products provide the benefit of consistent material consolidation and gradient angles in accordance with ADA recommendations.

The complete table offers integral ramps and table top at 9.8 ft long, thereby ensuring a smooth transit.

Individual ramp sections offer a more exacting and economical alternative to in-situ formed ascent and descent ramps, as part of an asphalt system.
